PROFILE

Third-year BSc (Hons) Information Technology undergraduate at the University of Moratuwa with hands-on experience developing and deploying full-stack web applications. Proficient in React, Node.js, NestJS, Firebase, and MongoDB, with practical experience in REST API development, authentication, role-based authorization, database management, and responsive frontend development. Experienced in leading student software projects from requirements analysis and system design through implementation and deployment. Seeking a Software Engineering Internship to apply and further develop my technical, problem-solving, and teamwork skills.

EDUCATION

BSc (Hons) in Information Technology - Third Year Undergraduate
Faculty of Information Technology, University of Moratuwa
Mahinda Rajapaksha College
G.C.E. Advanced Level - Mathematics Stream: AAB
District Rank: 150 | Z-Score: 1.7792
G.C.E. Ordinary Level: 9 A's

TECHNICAL SKILLS

- Programming Languages: Java, JavaScript, TypeScript, C/C++
- Frontend Development: React, Vite, Tailwind CSS, React Router, Next.js
- Backend Development: Node.js, Express.js, NestJS, RESTful APIs
- Databases & Cloud: MongoDB, Firebase, Firestore, Supabase
- Authentication & Payments: Firebase Authentication, JWT, OAuth 2.0, PayHere, Stripe
- Technologies: OpenAI, Groq, Pinecone, Vector Search
- Tools & Deployment: Git, GitHub, Vercel, Railway, Netlify

PROJECTS

MediCareX-Pharmacy Supply Chain Management System

Team Leader | Second Year Group Project

Tech Stack: React, Vite, Tailwind CSS, NestJS, TypeScript, Firebase/Firestore, Firebase Authentication, Axios, Cloudinary, PayHere, OpenAI, Groq, Pinecone

Project Overview

- Developed a full-stack pharmacy supply chain management platform integrating customers, pharmacists, suppliers, and administrators, with end-to-end workflows for online ordering, prescription management, inventory management, supplier procurement, purchase orders, payment tracking, loyalty rewards, and AI-powered analytics.
- Designed and implemented workflows covering the full pharmacy operations lifecycle, including customer order management, prescription processing, supplier procurement, and administrative monitoring and reporting.
- Implemented role-based access control to provide secure, role-specific functionality across the four user types.

My Contribution - Admin & Supplier Dashboards

- Designed and developed Admin and Supplier dashboard modules for monitoring products, orders, inventory, payments, suppliers, and procurement activities.
- Implemented an end-to-end supplier purchase order workflow covering order creation, supplier approval/rejection, delivery tracking, order status management, and initial/final payment tracking.
- Automated PDF invoice generation and integrated invoice and payment records with supplier purchase orders.
- Developed supplier product management features for product submission, approval tracking, product updates, visibility management, and stock management.
- Implemented Admin dashboard functionality for user management, supplier and pharmacist account approvals, product approval workflows, order monitoring, payment tracking, notifications, and financial analytics.
- Developed AI-powered sales forecasting using historical sales data to predict short-term and medium-term demand and identify potential stockout risks.
- Implemented supplier analytics and AI-driven recommendations for supply urgency, payment risk, and restocking based on order and invoice history.
- Implemented role-based notifications to communicate purchase order, payment, and delivery updates between administrators and suppliers.
- Contributed to secure authentication and authorization using Firebase Authentication, custom claims, and NestJS route guards for role-based access control.

Live Demo: innovatexuom.vercel.app

Study Helper Bot AI Powered Study Workspace

Personal Project

Tech Stack: Next.js 16, React 19, TypeScript, Tailwind CSS, Vercel AI SDK, Groq, Zod

- Built an AI-powered study workspace supporting AI-generated explanations, MCQ generation, short-answer practice, and session progress tracking.
- Implemented API routes for chat, question generation, AI-powered grading, and structured AI responses, and deployed the application on Vercel.

Live Demo: study-helper-chat-bot.vercel.app

Personal Portfolio Website

Tech Stack: React, Tailwind CSS, React Icons

- Designed and developed a responsive personal portfolio website to showcase technical skills, academic projects, and development experience.
- Implemented smooth scrolling, dynamic active-section highlighting, and mobile-responsive navigation.
- Deployed the application using GitHub Pages.

Live Demo: <https://gayangidevindi.github.io/>

AI Image Generator

Personal Project

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Supabase, Pollinations AI, Groq, Stripe

- Architected a server-authoritative credit and payment system with webhook signature verification and Row Level Security (RLS) policies, preventing users from manipulating their credit balance or accessing other users' data.
- Implemented social authentication alongside email-based authentication, with automatic profile provisioning during signup and editable user profiles supporting avatars, bios, and contact details.
- Independently designed, developed, and deployed the application end-to-end, covering database architecture, backend logic, payment integration, and frontend development, and delivered it as a production-ready application.
- Built a feedback and testimonial system with opt-in public visibility and manual moderation to maintain content quality and user trust.

Live Demo: <ai-image-generator-omega-three.vercel.app>

DigiX - E-Commerce Platform

Personal Practice Project

Tech Stack: React, Node.js, Express.js, MongoDB, PayHere

- Developed a full-stack e-commerce platform with a responsive React frontend and RESTful backend supporting authentication, product catalog management, and shopping cart functionality.
- Integrated the PayHere payment gateway to support secure online checkout and payment processing.
- Designed MongoDB/Mongoose schemas for users, products, and shopping carts.

PetShop - E-Commerce Platform for Pet Products

Personal Practice Project

Tech Stack: React, Node.js, Express.js, MongoDB, Mongoose

- Developed a full-stack e-commerce platform with 23 RESTful API endpoints covering user, product, order, contact, and subscription modules.
- Designed and implemented a recurring subscription system for scheduled product deliveries.
- Developed a responsive React frontend using the Context API for centralized shopping cart state management.

ACHIVEMENTS & AWARDS

- 3rd Place - WebX Portfolio Design Competition | FestX 6.0, organized by IEEE Women in Engineering (WIE) Affinity Group, University of Moratuwa
- UI/UX Prototype Phase (Selected for second round) | Team NEONFRAME | Organized by Leo Club of University of Sri Jayewardenepura & Leos of Sri Lanka and Maldives

CERTIFICATES AND TRAINING

- AWS Knowledge: Amazon Q Developer Fundamentals - Amazon Web Services (AWS) (Training Badge)
- Object Oriented Programming Foundations - 10Pearls University
- Python from Zero-to-Hero (Beginner Level) - Udemy
- Python for Beginners - University of Moratuwa
- Introduction to Machine Learning - Coding Foundation, Sololearn

VOLUNTEER EXPERIENCE

IEEE Student Branch - University of Moratuwa | Member

IEEE Women in Engineering (WIE) Affinity Group - University of Moratuwa | Member

LANGUAGES

English: Professional Proficiency
