PROFILE

Third-year BSc (Hons) Information Technology undergraduate at the University of Moratuwa with hands-on experience developing and deploying full-stack web applications. Proficient in React, Node.js, NestJS, Firebase, and MongoDB, with practical experience in REST API development, authentication, role-based authorization, database management, and responsive frontend development. Experienced in leading student software projects from requirements analysis and system design through implementation and deployment. Seeking a Software Engineering Internship to apply and further develop my technical, problem-solving, and teamwork skills.

EDUCATION

BSc (Hons) in Information Technology - Third Year Undergraduate - CGPA - 3.4

Faculty of Information Technology, University of Moratuwa

Mahinda Rajapaksha College

G.C.E. Advanced Level - Mathematics Stream: AAB

District Rank: 150 | Z-Score: 1.7792

G.C.E. Ordinary Level: 9 A's

TECHNICAL SKILLS

- Programming Languages: Java, JavaScript, TypeScript, C/C++
- Frontend Development: React, Vite, Tailwind CSS, React Router, Next.js
- Backend Development: Node.js, Express.js, NestJS, RESTful APIs, PHP
- Databases & Cloud: MongoDB, Firebase, Firestore, Supabase, MySQL
- Authentication & Payments: Firebase Authentication, JWT, OAuth 2.0, PayHere, Stripe
- Technologies: OpenAI, Groq, Pinecone, Vector Search
- Tools & Deployment: Git, GitHub, Vercel, Railway, Netlify

PROJECTS

MediCareX-Pharmacy Supply Chain Management System

Team Leader | Second Year Group Project

Tech Stack: React, Vite, Tailwind CSS, NestJS, TypeScript, Firebase/Firestore, Firebase Authentication, Axios, Cloudinary, PayHere, OpenAI, Groq, Pinecone

Project Overview

- Built a full-stack pharmacy supply chain management platform connecting customers, pharmacists, suppliers, and administrators, with end-to-end workflows for online ordering, prescription management, inventory, procurement, purchase orders, payments, loyalty rewards, and AI-powered analytics.
- Designed end-to-end operational workflows covering customer orders, prescription processing, supplier procurement, purchase order management, and administrative monitoring and reporting.
- Established secure role-based access control (RBAC) to deliver tailored functionality and permissions across four user roles.

My Contribution - Admin & Supplier Dashboards

- Designed and developed Admin and Supplier dashboards covering product, order, inventory, procurement, payment, and supplier management, with workflows for purchase orders, approvals, delivery tracking, PDF invoices, and role-based notifications.
- Engineered AI-powered sales forecasting and supplier analytics to predict demand, identify stockout risks, assess supply urgency and payment risks, and support payment management.

GitHub: <https://github.com/SoftwareProjectInnovateX>

Study Helper Bot AI Powered Study Workspace

Personal Project

Tech Stack: Next.js 16, React 19, TypeScript, Tailwind CSS, Vercel AI SDK, Groq, Zod

- Built an AI-powered study workspace supporting AI-generated explanations, MCQ generation, short-answer practice, and session progress tracking.
- Implemented API routes for chat, question generation, AI-powered grading, and structured AI responses, and deployed the application on Vercel.

Live Demo: study-helper-chat-bot.vercel.app

GitHub: https://github.com/gayangidevindi/StudyHelper_Chat_Bot

Java Academy - Interactive Java Learning Platform (In development)

Tech Stack: Next.js, React, TypeScript, CSS Modules, MDX, RESTful APIs, Groq

- Built an interactive learning platform for mastering Java programming through comprehensive tutorials, code examples, and interactive quizzes.
- Implemented AI-powered quiz generation and real-time chat support, with progress tracking, search, responsive design.

Live Demo: <https://java-accademy.vercel.app/>

GitHub: https://github.com/gayangidevindi/Java_Accademy

Personal Portfolio Website

Tech Stack: React, Tailwind CSS, React Icons

- Designed and developed a responsive personal portfolio website to showcase technical skills, academic projects, and development experience.
- Implemented smooth scrolling, dynamic active-section highlighting, and mobile-responsive navigation.
- Deployed the application using GitHub Pages.

Live Demo: <https://gayangidevindi.github.io/>

GitHub: <https://github.com/gayangidevindi/gayangidevindi.github.io>

AI Image Generator

Personal Project

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Supabase, Pollinations AI, Groq, Stripe

- Architected a server-authoritative credit and payment system with webhook signature verification and Row Level Security (RLS) policies, preventing users from manipulating their credit balance or accessing other users' data.
- Implemented social authentication alongside email-based authentication, with automatic profile provisioning during signup and editable user profiles supporting avatars, bios, and contact details.
- Independently designed, developed, and deployed the application end-to-end, covering database architecture, backend logic, payment integration, and frontend development, and delivered it as a production-ready application.
- Built a feedback and testimonial system with opt-in public visibility and manual moderation to maintain content quality and user trust.

DigiX - E-Commerce Platform

Personal Practice Project

Tech Stack: React, Node.js, Express.js, MongoDB, PayHere

- Developed a full-stack e-commerce platform with a responsive React frontend and RESTful backend supporting authentication, product catalog management, and shopping cart functionality.
- Integrated the PayHere payment gateway to support secure online checkout and payment processing.
- Designed MongoDB/Mongoose schemas for users, products, and shopping carts.

GitHub: https://github.com/gayangidevindi/digiX-pet-project_2

PetShop - E-Commerce Platform for Pet Products

Personal Practice Project

Tech Stack: React, Node.js, Express.js, MongoDB, Mongoose

- Developed a full-stack e-commerce platform with 23 RESTful API endpoints covering user, product, order, contact, and subscription modules.
- Designed and implemented a recurring subscription system for scheduled product deliveries.
- Developed a responsive React frontend using the Context API for centralized shopping cart state management.

ACHIEVEMENTS & AWARDS

1. 3rd Place - WebX Portfolio Design Competition | FestX 6.0, organized by IEEE Women in Engineering (WIE) Affinity Group, University of Moratuwa
2. UI/UX Prototype Phase (Selected for second round) | Team NEONFRAME | Organized by Leo Club of University of Sri Jayewardenepura & Leos of Sri Lanka and Maldives

CERTIFICATES AND TRAINING

1. AWS Knowledge: Amazon Q Developer Fundamentals - Amazon Web Services (AWS) (Training Badge)
2. Object Oriented Programming Foundations - 10Pearls University
3. Python from Zero-to-Hero (Beginner Level) - Udemy
4. Python for Beginners - University of Moratuwa
5. Introduction to Generative AI Studio - Simplilearn SkillUp (Powered by Google Cloud)
6. Introduction to Machine Learning - Coding Foundation, Sololearn

VOLUNTEER EXPERIENCE

IEEE Student Branch - University of Moratuwa | Member

IEEE Women in Engineering (WIE) Affinity Group - University of Moratuwa | Member

LANGUAGES

English: Professional Proficiency
